SUMMARY

Software Engineering Intern at Itaú Unibanco, focused on back-end development in Python, cloud computing (AWS) and infrastructure as code (Terraform). Hands-on experience with REST APIs, event-driven architecture, data modeling (SQL and DynamoDB), Docker and CI/CD with GitHub Actions. Pursuing a Bachelor's degree in Software Engineering at UniAnchieta.

EXPERIENCE

Software Engineering Intern | Itaú Unibanco May 2026 – Present

- Back-end development in Python in a hybrid squad working closely with business teams.
- Infrastructure as code with Terraform (IAM, KMS, API Gateway, RDS).
- Daily work with AWS services (Lambda, S3, DynamoDB, IAM, CloudWatch) and DynamoDB data modeling.

IT Assistant | Artfinal Eventos 2026 (1 month)

- Maintained internal PHP and Laravel systems, wrote MySQL queries and built Python automations.

Logistics Apprentice | Vetnil Jan 2024 – Dec 2025

- Supported logistics operations, process control and organization in a corporate environment.

PROJECTS

Vero – Real-time fraud detection github.com/chequinato/vero-webhook

- C# and .NET API that receives transactions via webhook (HMAC) and decides in real time: synchronous rules block (HTTP 403) and suspicious cases go to asynchronous review with an ML.NET risk score.
- Clean Architecture, PostgreSQL, SQS, SNS and an AWS Lambda worker provisioned with Terraform; unit tests with xUnit.

FX Lambda – Serverless currency exchange processor github.com/chequinato/serverless-python-api

- Python AWS Lambda scheduled by EventBridge: fetches exchange rates, generates alerts and archives reports in S3.
- API Gateway, Secrets Manager with KMS, least-privilege IAM, 100% Terraform infrastructure and pytest tests.

Reembolso – B2B corporate expense reimbursement API (in progress) github.com/chequinato/reembolso-contract

- Java and Spring Boot, contract-first (OpenAPI and AsyncAPI validated in GitHub Actions), PostgreSQL, RabbitMQ with retry and DLQ, Redis, JWT and idempotency.

Energy Processor – Energy consumption API and dashboard github.com/chequinato/energy-processor

- FastAPI and SQLAlchemy REST API that validates and processes CSV/Excel files, with Redis caching, Docker Compose and CI/CD on GitHub Actions.

EDUCATION

Bachelor of Software Engineering | UniAnchieta, Jundiaí, Brazil Feb 2026 – Present
Logistics Technician | SENAI Jundiaí 2023 – 2025

TECHNICAL SKILLS

Languages: Python, SQL, C#, Java, TypeScript, JavaScript
Back-end: FastAPI, .NET, Spring Boot, Node.js, RESTful APIs, OpenAPI, messaging (SQS, SNS, RabbitMQ)
Cloud and DevOps: AWS (Lambda, S3, API Gateway, EventBridge, DynamoDB, IAM, CloudWatch, Secrets Manager, KMS), Terraform, Docker, GitHub Actions, CI/CD, Git
Databases: PostgreSQL, MySQL, DynamoDB, Redis, MongoDB, data modeling
Practices: Clean Architecture, SOLID, event-driven architecture, unit testing (pytest, xUnit, JUnit)

CERTIFICATIONS

Microsoft Applied Skills: Azure Storage (2026) | AWS Cloud Quest: Cloud Practitioner (2026) | AWS Cloud Practitioner Essentials (2026) | AWS Certified Cloud Practitioner CLF-C02 Prep Course – Udemy (2026) | Data Modeling – Itaú Unibanco (2026) | D&A Foundation Practitioner – Itaú Unibanco (2026) | Claude Code 101 – Anthropic (2026)
